

The Repartee® LX PC-based unified messaging solution brings you the power of centralized message control by allowing you to manage your communications over the telephone, or from your PC. With Repartee LX, accessing messages and managing calls is easy and convenient. The foundation for a full-featured, proven and affordable unified messaging solution begins with Repartee LX.

Active Voice's Repartee products were pioneers in the unified messaging industry with their first release in 1985. They merged the voice and data world with the release of Repartee CTI in 1993. Active Voice is proud to deliver the latest version of Repartee that operates on the Linux operating system. You can rest easy knowing your business is using one of the most proven and reliable messaging systems on the market.

## Impressive Features and Functionality From an Industry Leader

### *Linux Operating System.*

The Repartee LX product leverages the simplicity, strong performance, reliability and cost-savings of the Linux operating system. With Repartee LX, you can take advantage of low equipment costs and an open-standards system that requires no licensing fees.

### *Text-to-Speech.*

With mobility in mind, we are excited to offer the industry-leading Scansoft® RealSpeak™ Text-to-Speech (TTS) engine. This feature converts text into human-sounding synthesized speech, which allows you to access, listen and respond to e-mail messages promptly via the telephone, whether you are working from the office or traveling on the road.

### *Security.*

We have enhanced Repartee LX to give System Administrators customary and up-to-date tools and reports for more advanced, system-wide security. With these improved security measures, System Administrators can configure new mailboxes with a default password, or further protect employees by requiring individual security codes.

## Affordable

The Repartee LX product offers advanced unified messaging, voice mail and automated attendant functionality, helping your organization become more responsive. Through its suite of unified messaging and call management applications, Repartee LX provides you with the most cost-effective unified messaging solution available.

## Proven and Reliable

The Repartee LX system is built upon a proven and flexible platform that delivers feature-rich performance, superior reliability and sophisticated functionality. Your business will benefit from better customer service, increased accessibility, and investment protection in your communications infrastructure.

Active Voice knows that reliability is paramount to your business. As your business grows, we will have a competitive communications solution to meet your needs.
