DIGITEL

Is it time to Move Your Business Communications to the Cloud?

One of the newest and fastest growing trends in telecommunications is called "Hosted" or "Hosted VoIP". From a technology standpoint, it is about moving your business communications to the Cloud, but it is also a change in the way you pay for your office phone system and unified communications solution. As opposed to making a capital investment for the ownership, the hosted approach allows you to pay for this service on a monthly basis. So, it's both a new technology and a new approach to expense management.

In the Hosted world, your communications system resides in "the Cloud", on a server in a remote data centre, and you access it with an Internet connection. Servers installed in our state-of-the-art data centre are fully redundant with failover protection and are supervised around the clock. This ensures the high availability and reliability that your business demands. This service continuity protects the lifeline of your business by keeping you connected 24/7/365.

DIGITEL CLOUD SERVICES

Communications travel
through the Internet

Digitel provides and manages
the backbone network

You can work anywhere and everywhere
with the device of your choice

Not all Hosted PBX Services Are Created Equal

With Digitel Cloud Services, you get secure and reliable, enterprise-class service without the enterprise-class cost. We put your entire phone system in the cloud, so there is less to manage, and it is "future-proof" with additional features and functionality immediately available as developed. No more new phone system every five to seven years. This could be the last phone system you'll ever need!

All of the Capability of our Enterprise Class IP-PBX

Your unified communications system should help your business increase revenue, become more efficient, control cost, increase productivity, and improve your level of customer service.

With Digitel Cloud Services, you get the most advanced, reliable and fully-featured business phone system in the industry without the investment in telephone system equipment. It includes all of the capability of our premised-based Zultys MX platform.
