Digitel Systems Inc. Delivers Desktop-to-Desktop Videoconferencing Solutions

*Innovative Technology Set to Replace
Outdated Voicemail Systems*

VANCOUVER, BRITISH COLUMBIA - September 27, 2011 – Digitel Systems Inc., an industry leader in unified communications, announced today that they have extended their product offering to include desktop-to-desktop videoconferencing solutions. These solutions will add a vital component to the breadth and depth of Digitel Systems Inc.'s product mix, and will give their customers tremendous flexibility when collaborating.

Desktop-to-desktop video conferencing solutions enable users to conduct face-to-face meetings without leaving their desk. Multiple parties can collaborate with one another on various projects, increasing office productivity. Essentially, this dynamic technology elevates our expectations of basic web and audio conferencing tools. Users simply log-in to their video conferencing provider's software, turn on their webcam and are then able to view one another and interact as if everyone were sitting in the same room. Videoconferencing

has gained traction due to its ability to show non-verbal communication and increase the "human feel" of meetings. Additionally, Digitel Systems Inc.'s customers are experiencing huge savings in travel related expenses and have eliminated unnecessary travel time.

"We're thrilled to bring another critical solution to our loyal customer base," commented Jerry McKenzie. "This technology has been available for years but it has finally matured and reached the desktop. We are seeing many of our customers utilizing this to leave their competitors in the dust. Our philosophy has been, and always will be, to create a long-term relationship with our customers by providing them with technology that either increases their profitability or provides them with a competitive advantage," added McKenzie. "Desktop-to-desktop videoconferencing is poised to revolutionize the way small to mid-sized businesses communicate and compete with large corporations."

**ABOUT DIGITEL SYSTEMS
INC.**

Founded in 1984, Digitel Systems is a leader in voice communications in British Columbia. The company's mission is to increase its customers' profitability, improve their productivity and give them a competitive advantage by implementing the right technology.
